FEATS

In the IT Industry since age 13 (1995). Designed and programmed an automated software management application that standardizes computers deployed within a company (aka Pushbot).

SPECIAL ABILITIES

Working with deadlines in a cutting edge production environment using bleeding edge technologies. Finding innovative internal IT Helpdesk solutions that combine creativity and productivity while still meeting corporate business standards and expectations. Quick learning and adaptation skills for any environment.

EXPERIENCE AND CAMPAIGN HISTORY

Starting in 1993 and continuing to this day, Ben began learning computer operation and repair through his father's business Metro Computer. From 2003 to 2005 he worked for the company Charmed Expressions, implementing an inventory control system nearly from the ground up, while also providing helpdesk support for the 15 people working there. In 2005 Ben joined forces with Sony Computer Entertainment America. After over a year working as a video game QA tester, he moved on to be IT support for SCEA's motion capture, 3D modelling and video production group. Since 2008 Ben has been working in the general production IT department, supporting all departments working to create international video games and related media.
